An Abstract, on a SEPARATE page must be provided.

A replacement figure 1, identified as PRIOR ART, must be provided.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

For example, no clear antecedent basis is seen "the frame" in claim 1, line 1 and "the screw" in claim 4, line 2. It is not clear what exactly "fix" means in, claim 1, line 2, and what "reversibly" means, in claim 2, line 2.

It appears that in claim 10, line 2, "consist" should be changed to –comprises–.

The specification should be revised to explain what "fix" and "reversibly" means.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Sawyers (note especially figs. 2-6) or Guillot (note especially fig. 5).

Note the prior art cited on the IDS submitted 8/3/06, especially feet 5, in Chang, and the screw d in Campbell.

Wu, teaching the use of a bayonet coupling in a sofa bed, is cited as relevant art.
